HS Code Update on eTrade

HS Codes have been updated to reflect the latest as per BOC Tariff Release. Some HS Codes may be 'invalid,' if this error is encountered open the Item/Commodity and change the HS Code to the closest possible description. For bulk updates and future reference engage your Brokers to assist in updating the HS Codes. PEZA List of Exportables are likely to be affected with these changes. Please contact your respective CDEC Account Managers for further information.

Attention!

- This only applies to items with “Invalid HS Code” error encountered.
- If no error, you are good to proceed.

Other instructions:

1. You may leave the first few (4 to 5) digits as is.

- HS Codes are usually grouped according to the commodity and its related parts/forms are usually of the same number codes.

2. Then a drop down list will appear

3. Choose from the list that closely describes your commodity.

4. If further assistance in classifying is needed, please contact your Broker or CDEC CS can suggest possible HS Code options.

- CDEC can only suggest
- Broker or the Locators' final classification and HS Code used prevails
